AMERICAN ORDNANCE ASSOCIATION
Transportation Building, Washington, D. C. 20006

The
American Ordnance Association
Has the Honor to Invite You to
Membership in the Society,
To Share in its Patriotic Work
For the National Defense,

AND TO RECEIVE THE MANY PRIVILEGES OF MEMBERSHIP

BUILDING PEACE THROUGH STRENGTH

Accept this invitation and help build the armament skill and knowledge so essential to national survival in the atomic age. You will join 46,000 other patriotic citizens who, as members of the American Ordnance Association, believe that a strong United States is our only sure deterrent against Communist aggression. For nearly half a century the A.O.A. has been the outstanding advocate of armament preparedness and industrial readiness for our Nation's defense.

INFORMED, PATRIOTIC AMERICANS

As a member you will unite with executives, engineers, and scientists of American industry, military and civilian personnel of our armed forces, and other defense-minded citizens from all walks of life. Through A.O.A. membership you stay abreast of significant armament and defense matters.

EXCLUSIVE ARMAMENT PUBLICATIONS

You will receive *ORDNANCE* magazine, which now includes the *Armed Forces Chemical Journal*. Authentic articles and reports keep you posted on new military weapons. In addition, the new Weapons Technology section provides valuable technical information on ordnance engineering and production problems. Recognized as *the* authority on armament subjects, *ORDNANCE* is a real time-saver for persons who must keep up to date in weaponry.

Every month in *THE COMMON DEFENSE* newsletter you get concise, last-minute news and commentary on armament, space developments, and national defense policy.

These exclusive publications bring you a fascinating, highly readable account of overall weapons progress, plus the technical and scientific data so helpful to the engineer, scientist, or other ordnance professional.

ACTIVE, INFORMATIVE MEETINGS

You will belong to a local A.O.A. Chapter or Post where you can meet and exchange ideas with outstanding industrial and military

men, hear prominent speakers discuss current ordnance projects and future requirements. You will be invited to visit military establishments and factories, and to attend the National Annual Meeting which features weapons tests and demonstrations.

SECURITY WITH SOLVENCY

History proves that we can have adequate defense at minimum cost through an active Industry-Military Team ready for instant defense as well as for full-scale armament production. This is especially true today when each new weapons system is more complex than the last, requiring greater scientific knowledge and technical skill.

DIRECT SUPPORT OF THE ARMED FORCES

Ever since the Association was founded in 1919 it has functioned as a liaison between the armed forces and industry in the research, development, and production of superior weapons. Today several thousand A.O.A. members—highly qualified civilian and military specialists—serve on the Association's Technical Divisions and Sections. On a voluntary basis, and at the invitation of the armed services, they study, advise, and help solve many of the Nation's armament problems—at no cost to the government.

Although not all the Association's 46,000 members participate in these technical operations, every one supports this and other important programs through A.O.A. membership.

THE NATION'S SCIENCE-INDUSTRY-DEFENSE TEAM

As the one society equipped to coordinate the efforts of industry and military in the development of new armament, the A.O.A. plays a vital role in the defense program. Members know that a continuing, ever stronger Science-Industry-Defense Team will be needed by our country in the months and years ahead.

Receive the many practical A.O.A. benefits by returning the membership application *today*. Annual dues are only \$7.00. Or, select the money-saving rate of \$17.50 for three years.

In these perilous times your membership can be especially valuable—both to you and to your country.

MEMBERSHIP APPLICATION

I hereby apply for individual membership in the American Ordnance Association and enclose annual dues (\$7.00 for one year, or 17.50 for three years) which include ORDNANCE and other publications, and all membership privileges. *I certify that I am a citizen of the United States.*
